👤 Profile

Goal-driven and fast learner with high self-discipline, analytical skills, and problem-solving abilities. **Passionate** about programming and dedicated to combining my technical expertise with innovative projects. **Experienced** basketball player and personal trainer, adept at fostering team collaboration and discipline. Quick learner with a strong commitment to continuous improvement.

📁 Projects

Udemy Demo 🔗

Udemy-Demo is a web application designed to manage courses and users. The application allows users to add courses, view course details, and manage their personal course lists. The backend uses C# and ASP.NET Core, while the frontend utilizes JavaScript and jQuery. Data is stored in a SQL Server database.

Flight Board 🔗

Contributed to the development of a Flight Board Project, utilizing HTML, CSS, and JavaScript to create an interactive web application for displaying and managing flight information, including filtering, sorting, and visual representation of data.
